The top-10 makers are missing from the fills of wallets that were toxic the night before
All fills at the touch:
2.6–6.5× fewer of the toxic wallets' fills
Only fills with no mid move in the next 1 s (not pick-offs):
still 1.3–2.8× fewer, so it is not speed alone
wallet was benign on night 1
wallet unseen on night 1
wallet was toxic on night 1
top-10 makers' share of that wallet type's fills on night 2
